Science is a huge topic, but this friendly book breaks it down into bite-sized chunks, making it an accessible introduction for anyone who wants to find out about this fascinating subject. Highly illustrated, in a pictorial, 'infographics' style, with snippets of information about all aspects of science from particle physics to genes and DNA.

Astronomers are discovering more and more information about space, making the subject a very hot topic in schools and out of it. This guide is full of genuine facts, answering all our space-related questions and prompting more along the way. Aimed at children aged nine and over, the pictorial info-graphics style illustrations provide easily digestible facts in bite-size chunks.

An eye-catching information book filled with one hundred interesting facts to learn about food: for example, learn about how cooking came about, the different methods used (grilling, boiling, fermentation etc) and what purposes it served in terms of nutrition. It will also be a great way to educate children about nutrition and the issues around overeating, junk food and obesity.

An eye-catching information book filled with one hundred quirky and surprising facts about the seas and oceans. Do fish wear pyjamas? What's the sound of an iceberg melting? How many sheep did it take to launch a Viking longship? Which is faster - a tsunami or a bullet train? Find the answers to these and many more questions in a book that explores the history, science, environment and art of our planet's seas and oceans. Richly illustrated and perfect for broadening children's knowledge of an essential subject, away from the classroom. Part of the popular '100 Things to Know' series, ideal gifts for fact-hungry children. Each page features a new fact supported by clear, comprehensible explanations and bold illustrations, maps and infographics. Perfect to dip in and out of, alone or with friends and family.

The body is a huge topic, but this friendly book breaks it down into bite-sized chunks, making it an accessible introduction for anyone who wants to find out about this fascinating subject. Highly illustrated, in a pictorial, 'infographics' style, with snippets of information about all aspects of the body.

This informative book is filled with 100 fascinating facts about food, from how to grow a burger in a laboratory to how many bees it takes to fill an orchard with apples. With bright, infographic-style illustrations, detailed facts on every page, a glossary and index, plus internet links to specially selected websites for more information.

When was the webcam invented and why? Do imaginary numbers exist? What is fuzzy logic? Find the answers these questions about the amazing world of numbers, computers and coding, along with loads of other curious, amazing and mind-boggling facts, in this eye-catching book that is absolutely bursting with information. Covers a wide range of topics from Ancient counting systems to unsolved mathematical mysteries and the latest in wearable computer technology, including all kinds of things you won't find in an ordinary text book. With bold illustrations, picture maps and infographics, and clear, comprehensible text, children can pore over the information that they'll delight in sharing with family and friends. Also includes links to specially selected websites with further information, games and video clips. Part of the popular '100 Things to Know' series, ideal gifts for fact-hungry children.
