In order to keep this LED grow light cool, the manufacturer has added powerful cooling ...

15+ Best LED Grow Lights Reviews for Weed, Cannabis, Money ...

With LED grow lights, you will generally get better results with many smaller LED panels, as opposed to a few big LED panels. For example, you will often get better results with 2 x 125W LEDs (total 250W) than you would with a single LED model that produces 250W. This is because more panels often make it easier for you to spread the light to where it's needed.
