Note to self: Main text for BA 99.1: Fundamental Accounting Theory and Practice I; and, BA 99.2: Fundamental Accounting Theory and Practice II under Prof. Joselito G. Florendo of the UP College of Business Administration, Second Semester 1996-97

Students can measure their progress through a wealth of self-test material (with solutions) and a summary of chapter key points.

Revised to include an improved balance of material on using and creating financial information, this 11th edition of the text provides examples from real-world companies and intergrates comprehensive accounting problems throughout the book.

This public domain book is an open and compatible implementation of the Uniform System of Citation.

This soft-cover booklet is filled with columnar paper for each Problem in the textbook. Students encounter Checkpoints throughout the working papers to ensure they are on the right track

Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

An understanding of the basic accounting is a must for all professionals whether they are associated with accounting or non-accounting jobs. Considering the fundamentals and the practical implication of accounting procedures and methods, the Third Edition of the book has been enlarged further by adding three more chapters on Fund Flow Statement, Cash Flow Statement Analysis and Accounts of Non-trading Concerns. In view of the need of the current business scenario, these topics are introduced to help students learn new dimensions of the subject and to apply it to workplace scenario. The book is especially designed for the undergraduate students of computer application (BCA) and business administration (BBA). It is also useful for the postgraduate students of business administration (MBA).
