All animals are equal but some animals are more equal than others. It's just an ordinary farm - until the animals revolt. They get rid of the irresponsible farmer. The other animals are sure that life is improving, but as systems are replaced and half-truths are retold, a new hierarchy emerges . . . Orwell's tale of propaganda, power and greed has never felt more pertinent. With an exciting new cover and inside illustrations by superstar Chris Mould.

Delve deep into ecosystems by classifying the beings that live there. Our resource breaks down the different kinds of animals before studying their different adaptations. Start off by answering the question: what do we classify? Then, break down this classification into kingdom, phylum, class, family, genus, and finally species. Compare the differences between warm-blooded and cold-blooded animals. Create a brochure on your favorite vertebrate before inventing your own invertebrate. Introduce the concept of adaptation and how animals have changed based on their environment. Take this further by conducting a case study on the adaptations of the koala. Finally, explore the concept of evolution and how this idea is backed up by fossil records. Aligned to the Next Generation Science Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.

****This is the chapter slice "Vertebrates" from the full lesson plan "Classification & Adaptation" What Do We Classify? What is the difference between warm-blooded and cold-blooded animals? Students will also learn to distinguish between vertebrates and invertebrates, understand animal adaptation through a case study: The Koala and Its Adaptations.**

Our comprehensive, four-part study of animals is sure to captivate student interest. Our unit starts off with a knowledge-based presentation of twenty-six terms necessary for a proper understanding of animals. Then, students learn the important characteristics of the major vertebrate families (groups) — fish, amphibians, reptiles, birds, mammals. Next, students investigate some of the ways that animals have adapted to suit their environments. Finally, students complete a major project where they write a report on an animal. This Animal Science lesson provides a teacher and student section with a variety of reading passages, activities, crossword, word search, colouring book and answer key to create a well-rounded lesson plan.

Easily implement grade appropriate lessons suitable for Grade 2 classrooms. Based on current research, these easy-to-use lessons are based on a variety of strategies to differentiate your instruction. Activities are included to allow access to all learners. Includes interactive whiteboard-compatible Resource CD with sample projects, templates, and assessment rubrics. 160pp. plus Teacher Resource CD.
