Even though Boost.Asio can process any kind of data asynchronously, it is mainly used for network programming. This is because Boost.Asio supported network functions long before additional I/O objects were added. Network functions are a perfect use for asynchronous operations because the transmission of data over a network may take a long time ...

This book is great for developers that need to do network programming but don't want to delve into the complicated issues of raw networking API. What you want is an easy abstraction, which is just what Boost.Asio provides. Being part of the famous Boost C++ Library, chances are switching to Boost.Asio is just a few extra `#include` directives.
