In *The Science of the Sale*, Mike shares 170 pages of practical, how-to advice on building and maintaining professional relationships with customers who become lifelong friends. *The Science of the Sale* gives you the scientific tools to be successful in sales... nothing artistic about it. Chapter by chapter, Mike provides proven methods for identifying possible customers, getting the "second meeting," making a sales presentation, negotiating the contract, and following-up to make sure that promises are delivered upon. With illustrated tips, Beehler shows how to really love engaging with and serving your new customers as they become your career and lifelong friends. And, ultimately, friends like to do business with friends.

Set in a working-class Brooklyn neighborhood in 1947, this poignant tale revolves around two of the most endearing characters in recent fiction: an 11-year-old Irish Catholic boy named Michael Devlin and Rabbi Judah Hirsch, a refugee from Prague.

This first edition of the Utility Energy Efficiency Scorecard assesses the 51 largest US electric utilities across a range of energy efficiency metrics. The metrics fall into three categories critical to utility-sector efficiency: (1) quantitative savings and spending performance, (2) program diversity and emerging areas, and (3) targets, business models, and evaluation. Eversource MA and National Grid MA both performed best, tying for the top spot. The other top 10 utilities include Pacific Gas & Electric, Baltimore Gas & Electric, Eversource CT, Southern California Edison, San Diego Gas & and Electric, Commonwealth Edison, Portland General Electric, Xcel Colorado, and Xcel Minnesota. The Scorecard gives utilities, regulators, and other stakeholders a baseline and roadmap they can use to track performance and strengthen utility-sector energy efficiency.

"In the end," writes Tori McClure, "I know I rowed across the Atlantic to find my heart, but in the beginning, I wasn't aware that it was missing." During June 1998, Tori McClure set out to row across the Atlantic Ocean by herself in a twenty-three-foot plywood boat with no motor or sail. Within days she lost all communication with shore, but nevertheless she decided to keep going. Not only did she lose the sound of a friendly voice, she lost updates on the location of the Gulf Stream and on the weather. Unfortunately for Tori, 1998 is still on record as the worst hurricane season in the North Atlantic. In deep solitude and perilous conditions, she was nonetheless determined to prove what one person with a mission can do. When she was finally brought to her knees by a series of violent storms that nearly killed her, she had to signal for help and go home in what felt like complete disgrace. Back in Kentucky, however, Tori's life began to change in unexpected ways. She fell in love. At the age of thirty-five, she embarked on a serious relationship for the first time, making her feel even more vulnerable than sitting alone in a tiny boat in the middle of the Atlantic. She went to work for Muhammad Ali, who told her that she did not want to be known as the woman who "almost" rowed across the Atlantic Ocean. And she knew that he was right. In this thrilling story of high adventure and romantic quest, Tori McClure discovers through her favorite way—the hard way—that the most important thing in life is not to prove you are superhuman but to fully to embrace your own humanity. With a wry sense of humor and a strong voice, she gives us a true memoir of an explorer who maps her world with rare emotional honesty.

A healthy and united America--perhaps a country more united than it has ever been--is truly possible, and it starts with us. John Kingston draws on wisdom from history, science, faith, and culture, along with his own experiences, to offer eight principles for discovering purpose, meaning, and true community. We live in the greatest peace and prosperity that the world has ever known, but Americans are feeling more division, isolation, depression, and despair than ever before. These are issues of the soul. We seem unable to find purpose and meaning. We can't find "the life that is truly life"--a vibrant and purpose-filled way of living best experienced together. From his youth, Kingston has always carried a vision for a free and united America. With an approachable and conversational style, as well as a dash of humor, Kingston draws on a diverse and compelling collection of wisdom--the parables of the Bible and the philosophy of Aristotle, the legacy of Nelson Mandela and the speeches of Abraham Lincoln, the songs of Bruce Springsteen and current studies from the best neuro and social scientists today--to remind us that there is no "them," there is only us, and we're in this together. In *American Awakening*, Kingston offers eight timeless principles for breaking through this darkness and despair and cultivating a radical togetherness, both here in this country and around the globe. You'll discover the profound impact of: In-person connection Making more from less Discovering purpose Redeeming adversity Responding instead of reacting Finding your unique sense of belonging Wherever you find yourself politically or spiritually, a healthy and united America starts with you. Join the Awakening movement and let's rediscover who we are--together.

The *Agitators* tells of the enduring but tempestuous friendship of Susan B. Anthony and Frederick Douglass. Great allies? Yes. And at times, great adversaries. Young abolitionists when they met in Rochester in the 1840s, they were full of hopes, dreams, and a common purpose. As they grew to become the cultural icons we know today, their movements collided and their friendship was severely tested. This is the story of that forty-five-year friendship – from its beginning in Rochester, through a civil war, and to the highest halls of government. They agitated the nation, they agitated each other, and, in doing so, they helped shape the Constitution and the course of American history.
