This revised and updated color edition of How to Rebuild the Small-Block Ford walks you step by step through a rebuild, including: planning your rebuild, disassembly and inspection, choosing the right parts, machine work, assembling your engine, and first firing and break-in.

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"—smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles—one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. Kingdom of Twilight follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.

This is the story of the soon to be 17-year-old Loresha Evans, a junior in high school who has just won the election for student body president. She learns from the difficulty of leading a reluctant student council and noncaring student body the importance of patience and diplomacy. Loresha's social status changes and she becomes a member of the school's "in crowd." The price is the loss of her best friend. She experiences her first love, but is he right for her? Loresha's time in office as Major Horris High School's student president brings her face to face with school politics and personal challenges. This is the first book of the Loresha Evans trilogy.

Are you wondering how Americans can compete with nations like China? Are you wondering how, if they can offshore call centers, computer programming, and accounting, there will be any good jobs left they can't offshore? Are you wondering how America can keep importing and running up debt without going bankrupt? Are you wondering how America can be a powerful nation without an industrial base? Are you wondering why the politicians keep denying all of these problems? Are you wondering whether the economics you learned in school and hear on TV is really valid? Are you wondering who you can trust? This very readable book is aimed at both ordinary concerned citizens and people with a bit of sophistication about economics. It is a systematic examination of why free trade is slowly bleeding America's economy to death and what can be done about it. It explains in detail why the standard economic arguments free traders use all the time are false, and what kind of economic ideas - well within the grasp of the average American - justify protectionism instead. It examines the history and politics of free trade and explains how America came to adopt its present disastrous free trade policy. It looks at the breakdown of specific industries and how we can rebuild them and bring millions of high-paying jobs back to this country. It examines what's wrong with NAFTA, CAFTA, the WTO, and the proposed Trans-Pacific Partnership. It is sharply critical of the current establishment, but from a bipartisan point of view, so it should satisfy progressives, conservatives, and everyone in between. Unlike many past critiques of free trade, it is economically-literate; it also explains New Trade Theory, the hot new area of economics that critiques free trade.
