The recent publication in the European Respiratory Journal of the proceedings of the 6th World Symposium on Pulmonary Hypertension (WSPH) is an important milestone in pulmonary vascular medicine. Since the first WHO meeting on primary pulmonary hypertension in Geneva in October, 1973, these World Symposia have taken place in Evian (France, 1998), Venice (Italy, 2003), Dana Point (USA, 2008), and twice in Nice (France, 2013, and 2018).

An-insider-view-on-the-World-Symposium-on-Pulmonary-???

Since 1973 the World Symposia on Pulmonary Hypertension (WSPH) proceedings have summarised the scientific advances and future needs in this field through the efforts of multiple task forces, each focusing on a different aspect of pulmonary hypertension (PH) . The 6th WSPH comprised 124 experts, divided into 13 task forces, that began their work in January 2017 and presented their consensus opinions to an audience of 1376 participant attendees between February 27 and March 1, 2018 in Nice . . .

Proceedings-of-the-6th-World-Symposium-on-Pulmonary-???

Pulmonary hypertension (PH) is a chronic, complex and challenging disease. Advances in treatment are for the subset of patients with pulmonary arterial hypertension. Selected review of the literature was conducted incorporating the European Society of Cardiology/European Respiratory Society 2015 guidelines and recommendations from the Sixth World Symposium on Pulmonary Hypertension.

The 12th Annual Research Triangle PH symposium will reinforce the current diagnostic and management guidelines of PAH put forth by the 6th World Symposium on Pulmonary Hypertension in 2018, as well as updates from subsequent national and international conferences. In addition, there will be a focus on the different subgroups of Pulmonary Hypertension, covering the diagnosis, management, and treatment for patients with WHO group 2-5 PH.

At the recent 6th World Symposium on Pulmonary Hypertension (PH), the definition of PH was redefined to include lower pulmonary artery pressures in the setting of elevated pulmonary vascular resistance (PVR). However, the relevance of this change to subjects with PH due to left-heart disease as well as the preoperative assessment of heart transplant (HT) recipients is unknown.
