These design principles will definitely help web designers to develop awe-inspiring designs and to enhance the usability of a website. Here is the list of 8-good design principles which will make your website aesthetic, user-friendly, effective, and engaging: 1. Simple Is the Best.

~~8 Principles of Good Website Design - Astra~~

Design is no different from playing an instrument or even a chef making a meal. If the elements of graphic design (line, color, texture, shape) are the ingredients laid out in front of her and the principles of design (movement, rhythm, proportion, etc) are the recipe she uses to make the meal, then think of design layout and composition as the final plating.

~~The 5 rules of design composition and layout - 99designs~~

Design principles are aimed at helping designers find ways to enhance usability, influence perception, increase appeal, teach users, and make sound design decisions during projects. Although this is true, I would argue that UI design principles have begun to take on an even broader role.
