The micro, small, and medium enterprises sector is an important segment in many economies, but it is often beset by productivity problems that hinder its ability to grow and develop. A recent strand of literature identifies a possible contributor to overcoming challenges to SME growth - linkages with large businesses. Using a survey of 530 SMEs and a series of key informant interviews in Metro Manila, Philippines, this paper 1) gauged the extent

by which Philippine SMEs link with large businesses, 2) empirically verified the benefits (and disadvantages) to SMEs of linking with big firms, and 3) studied whether some forms of linkages are associated with certain SME success factors. Results showed that 1) Philippine SMEs are not extensively linked to large firms, 2) the primary benefits of linking with big firms to SMEs are knowledge transfer and access to markets and the primary disadvantages are bureaucracy in large firms and their strong bargaining power, 3) these linkages generally have net positive benefit to SMEs from the

economic development of fourteen countries in East, Southeast, and South Asia. Asian Development is mainly a story of success. Though some problems remain, Asian countries have shown remarkable resilience in responding to sharp changes in the international economy--oil shocks, world recession and inflation, exchange-rate and interest-rate fluctuations, and rapid technological change. The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies. Looking back they comment: "In the past, growth of
