ability to reproduce.

Salamander Dissection Guide -  
svc.edu

Salamanders and other amphibians (i.e frogs) are often used for dissections. Dissection continues today as much as (if not more than) it did 50 years ago (Hart, Wood, & Hart, 2008). Globally, the number of amphibians used in classroom dissections is unknown; however, the Johns Hopkins University Center for Alternatives to Animal Testing has estimated that 6 million vertebrate animals are dissected in U.S high schools each year, well over half of which are believed to be amphibians.

frog to learn the digestive and urogenital systems. For these systems, most vertebrates are dissected in a similar way, just the layout of the body differs and organs will be different in shape and in somewhat different places. You can follow the same set of instructions for a salamander or a frog.
