in the last 50 years. They contribute significantly to an increase people lifespan and maintain health and quality of life. Italian Scientists are very active in the field of Biomaterials. Many groups are working hard to develop new and improved materials gathering together chemical, physical, biological and medical expertise. They share knowledge, honesty, enthusiasm and friendship inside the Italian Society for Biomaterials. In this book, many examples of their activities and most update results are shown, offering an almost complete overview of the state-of-the-art of Italian R&D in the field of biomaterials. I'm sure that this book will serve as an important and useful reference source for material scientists, clinicians and entrepreneurs.

As the preventable disease and economic burden continues to mount for the United States and the world, it is becoming apparent that embracing prevention strategies is essential. Simply continuing on the same course and infrastructure will not suffice. The future we will leave our children is unsustainable without change. Amidst all the partisan political chaos, Integrative Preventive Medicine (IPM) practices are strongly entering the public consciousness since many are dissatisfied with their traditional health (sick) care delivery systems and the scientific validity of IPM is increasing rapidly. This IPM textbook, the first of its kind, authored by nationally recognized thought leaders and edited by the 17th Surgeon General of the

United States and the Canyon Ranch Medical Director will serve to bring together the science of IPM so that health practitioners have a ready reference containing practices that can prevent disease, decrease cost of care and improve the quality of life. Our IPM textbook is divided into three sections, Public Health and Evolving Science in IPM, Multidisciplinary Nature of IPM and The IPM Approach of Selected Clinical Problems, providing a continuum of IPM from basic science to clinical science to practical application. This depth and breadth of scientific information and comprehensive approach is a first for a single textbook in IPM. A must read for all health providers and students in order to incorporate these essential concepts into practice.

This work presents the first comprehensive and systematic treatment of all relevant issues and topics in contemporary global bioethics. Now that bioethics has entered into a novel global phase, a wider set of issues, problems and principles is emerging against the backdrop of globalization and in the context of global relations. This new stage in bioethics is furthermore promoted through the ethical framework presented in the UNESCO Universal Declaration on Bioethics and Human Rights adopted in 2005. This Declaration is the first political statement in the field of bioethics that has been adopted unanimously by all Member States of UNESCO. In contrast to other international

documents, it formulates a commitment of governments and is part of international law (though not binding as a Convention). It presents a universal framework of ethical principles for the further development of bioethics at a global level. The Encyclopedia of Global Bioethics caters to the need for a comprehensive overview and systematic treatment of all pertinent new topics and issues in the emerging global bioethics debate. It provides descriptions and analysis of a vast range of important new issues from a truly global perspective and with a cross-cultural approach. New issues covered by the Encyclopedia and neglected in more traditional works on bioethics include, but are not limited to, sponsorship of research and education, scientific misconduct and

Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!
