The latest information on brakes and antilock braking systems through 1995 models. Covers theory, operation, and repair techniques on late model hydraulic brakes and antilock braking systems, including both independent and integral ABS systems as well as economy ABS systems that should find their way to the market in 2-3 years. Also includes basic coverage of brakes on many older cars still on the road today. Includes all current mass-production domestic cars as well as many imports such as Honda, Toyota, and Volvo. ASE-styled review questions (as many as 22 per chapter) in the classroom manual help prepare students for the Automotive Service Excellence certification exam. Both the classroom and shop manuals are contained in a single volume; the spiral-wire binding allows text to lie flat on a workbench for easy reference of the shop manual.

Featuring three new chapters on hybrid and electric vehicles, this fully updated 5th edition of AUTOMOTIVE SERVICE: INSPECTION, MAINTENANCE, REPAIR helps students develop the knowledge and skills they need to be successful in a range of automotive careers. Known for its clear explanations and high quality art, this best-selling text covers all eight major course areas of automotive technology, from an introduction to shop management to theories of vehicle systems operations with step-by-step procedures for trouble shooting and repair. Technically reviewed by instructors and industry experts and reflecting the latest ASE Education Foundation's Automobile Program Standards, this edition is ideal for students enrolled in ASE Education Foundation-accredited programs.
